About this role		
Full Time (Levels 3-4)	Location: New York	
Job Search - Accelerated	I Mobile Pages (AMP)	$\heartsuit$
Team members	Flavio Palandri Eric Steinlauf Kaylin Spitz	
Swamy Sermadevi	Antonelli Ryan Kelly	
	e web great again! The goal of the Accelerated Mobile Pages (AMP) project is that every y, and the user experience is always excellent (no jankiness, no text moving around, no pop-	
CEO is a fan, and so is the NY isn't impressed though). AMP launched as an open sou AMP files for our preview dem	pject.org, g.co/amp and g.co/ampdemo (on your phone) to see what we're talking about. Our Firmes, and we even got some love from the tough crowd at Hacker News (fake Elon Musk rcce project in October 2015, with 26 publishers and over 40 publications already publishing b. Our team built g.co/ampdemo and is now racing towards launching it for all of our users. @ Google integrations, particularly focusing on Search, our most visible product.	
	<b>DKR</b> to deliver! By the end of 2016, our goal is that 50%+ of content consumed through	
÷.	t's passionate about building products that will improve users lives and who are willing to ng these products to the hundreds of millions of Search users.	
<ul> <li>has C++ or Java experience</li> </ul>	ing end-to-end on projects; backend and frontend parts (preference for one versus the other is of course OK); . JavaScript is a strong plus, and so is native (Android or iOS) development experience; reful consideration to how we evaluate our product's impact on users;	
Check out go/amphtml for a b	unch more details - design docs, roadmap, UX explorations, etc.
